*Report on the results of analysis of the examined objects*  
*vita chip 2.0 and vita chip health plus of the*  
***ac blue planet GmbH***

### Question

How do the vita chips from **ac blue planet** affect the structure of water?

### Method

The effect of the vita chips is investigated with the help of water crystal photography. Water absorbs information of any kind. Through photography this information becomes visible in the form of harmonic or disharmonic structures.

### Test object

"Neutral" water was chosen as the test object. Neutral water is distilled water denatured with acoustic frequencies to prevent crystal formation.

### Execution of the experiment

Each vita chip was attached to a Huawei P30 Pro smartphone (wireless standard 4G+), on which a vial of water was placed for a period of five minutes. The water was then frozen at  $-30^{\circ}\text{C}$  for 1 to 2 hours and then observed under a Leitz microscope.

### Results:

Figure 1: Neutral water

**Control condition: Water structure without external influence**

Result: No crystal formation. Geometrical configuration recognizable.

Figure 2: Water after smartphone influence

**Intervention condition smartphone: water on a smartphone without vita chip.**

Result: No coherent structure of water recognizable

Figure 3: Water after smartphone influence with vita chip health plus	
--	--

Intervention condition vita chip health plus:

Neutral water on smartphone **with vita chip health plus**

Coherent crystal formation

Intervention condition vita chip 2.0: Neutral water on smartphone **with vita chip 2.0**

Result: Coherent crystal formation

---

## Interpretation of the results

Figure 2 shows water without the influence of the vita chip. No crystal formation is visible, the water appears structureless and formless. On the other hand, it shows that the smartphone has a negative effect on the crystal formation of the water.

Pictures 3 and 4 show a clear and coherent crystal formation after influence of the vita chips. The crystal in the third picture shows a nice coloration inside, which suggests harmonic frequencies. Both crystals are harmonious, symmetrical and show clear structures. The crystal in picture 4 is of particularly high regularity, it is very voluminous and shows clear structures inside.

## Conclusion

**The vita chips from *ac blue planet* are capable of visibly changing water. They also have the ability not only to produce but to perfect the water structure under the destructive influence of EMF (smartphone) (recognizable by the hexagonal crystal formation).**
